SUMMARY

Web developer passionate about accessibility and responsiveness. With a background in research and brewing, is adept at problem solving and managing priorities. Excited to pursue a career collaborating with others to create user-centric websites.

SKILLS

JavaScript / HTML / CSS / React / Angular / Bootstrap / Angular Material / User Stories / Gherkin / Node.js / Express.js / MongoDB / JSON / RESTful APIs / Functional Programming / Object-Oriented Programming / Test-Driven Development / Behavior-Driven Development / GitHub / Postman / VS Code

PROJECTS

Crud Movie Application

React GitHub Repository: github.com/kellysdev/movie-client

React Live App: popopolis.netlify.app/login

Angular GitHub Repository: github.com/kellysdev/movie-Angular-client

Angular Live App: kellysdev.github.io/movie-Angular-client/welcome

- Single-page, responsive app with routing, several interface views, and a polished user experience.
- Two client-sides were built: one with React and Bootstrap, which is hosted on Netlify, and one with Angular, Angular Material, and TypeScript and is hosted on GitHub Pages.
- The server-side is a REST API built with Node.js, Express and MongoDB. API endpoints are documented with TypeDoc and were tested with Postman and the API is deployed on Heroku. Utilizes JWT authentication.

Meet React Application

GitHub Repository: github.com/kellysdev/meet | Live App: kellysdev.github.io/meet

- A serverless, progressive web application built using the test-driven development technique.
- Fetches and displays events from the Google Calendar API and renders event data in charts using Recharts.
- Uses AWS for the authorization server and uses OAuth2 authentication.

React Native Chat Application

GitHub Repository: github.com/kellysdev/chat-app

- Cross-platform chat application that allows users to share images, their location, text messages and to choose the color of the chat screen.
- Built with React Native, React Navigation, Expo, Google Firebase and the Gifted Chat library.
- Uses anonymous authentication via Google Firebase, chat conversations are stored in the Google Firestore Database and images are stored in Firebase Cloud Storage.

API Fetch App

GitHub Repository: github.com/kellysdev/Pokedex | Live App: kellysdev.github.io/Pokedex/

- Built with HTML, CSS, Bootstrap, JavaScript and some JQuery.
- Loads data from the PokeAPI and enables viewing of the data points in detail.
- Allows the user to search for Pokemon by name.

EDUCATION

Career Foundry | Full-Stack Web Development Certificate | June 2023 – June 2024

- Comprehensive online training program emphasizing the MERN tech stack, featuring intensive project-based learning and exploration of prominent libraries and frameworks.

University of California, Davis | B.S. Food Science & Technology | September 2013 – June 2015

WORK EXPERIENCE

Super Owl Brewing | Davis, CA | Assistant Brewer | April 2024 – Present

- Work with head brewer to brew beer, clean equipment, and package beer to meet production requirements.

Career Foundry | Remote | Student Full-Stack Developer | June 2023 – June 2024

- Gain proficiency in HTML, CSS, JavaScript, and front-end frameworks with a strong emphasis on responsive design, accessibility, and modern development tools and practices.

Sudwerk Brewing Co. | Davis, CA | Packaging Assistant | June 2023 – December 2023

- Manage tasks with competing priorities alongside the production team to transfer and package product and clean kegs.
